

*I run. I work hard. If
I'm injured, then I get
medical treatment.
If I need therapy, then
I decide where I want
to have it done...*

this is MY choice

So many of our county residents have treatment or surgeries done at larger hospitals. What they don't always know is that they have a choice...a choice to select where they can have physical therapy, swing bed recovery options or any number of post-operative treatments and follow ups.

Clay County Hospital is equipped to handle many of your needs. This way, you can recover close to home. Why drive long distances or hours away unnecessarily?

Talk with your specialist, surgeon or primary care provider and let them know that you want to stay close...close to family, friends and most importantly...home.
