

New 3D Mammography Now Available At Clay County Hospital!

3D

≥27%
Increase in cancer detection rates

≥40%
Increase in invasive cancer detection rates

115%
Increase in positive predictive value for recalls

20-40%
Reduction in recall rates

Call now to schedule your 3D Mammography exam. This is a revolutionary new screening and diagnostic breast imaging tool to improve the early detection of breast cancer. During the 3D part of the exam, an x-ray arm sweeps over the breast, taking multiple images in seconds. Images are displayed as a series of thin slices that can be viewed by our radiologists as individual images or in a dynamic interactive animation.
